Location
(Neighbouring states/
EU-countries):

centrally located in Germany and Europe:
good geographical location in terms of traffic,
and direct link to the national and international
main streets.

Key industries: automotive, logistics, aerospace, energy, food,
life science, shipping, engineering, agritechnical
engineering and agriculture

Number of
employees in logistics: ca. 220,000

Logistics Solutions

Important logistics hubs and functions:

Very good connections thanks to a good network of logistical hubs: unique density of seaports with individual trade competences. JadeWeserPort – container terminal Wilhelmshaven, which will soon be Germany's only deep-water port, multi-functional inland ports, freight villages with ideal trading conditions, dense network of terminals for combined traffic and direct access/connections to leading airports for airfreight in Northern Germany. Diverse and extensive logistical competences on the part of the companies, and suitable business locations in the best areas.

Lighthouse:

A freight village of 160 ha is constructed directly behind the terminal of the JadeWeserPort. The JadeWeserPort Wilhelmshaven is Germany's only tide-independent container deep-water port with a depth of 18 meters and 4 berths for the world's biggest ships.

A shipping logistics cluster of international importance and dimension is created and provides settlers and forwarders an infrastructure that is unique to Northern Europe: tri-modal, efficient and fast. The JadeWeserPort has a 16-track forwarding group, a KV-Terminal with 6 tracks and a direct connection to the highway without traffic lights.
